Leveraging AGRICULTURE for Improving NUTRITION and HEALTH
10-12 February, 2011 | New Delhi, India

Side Session:

Nutritional Enhancement in Food Legumes for Safeguarding Health and Nutrition in the Developing World

Date: Thursday, February 10, 2011
Time: 1300-1430 hrs
Venue: Roshanara Room, Taj Palace Hotel

Food Legumes

✓ play a key role in the food and nutritional security of low-income people
✓ are vital source of protein and essential nutrients for human health
✓ key components for diversification and intensification of cropping systems
✓ contribute to sustainable cropping systems by adding nitrogen, organic matter and generally improving soil health
✓ green and dry plant parts are good sources of animal feed

Chairperson: Dr. Kamel Shideed (ADG-International Cooperation & Communication, ICARDA)

1300-1330 hrs Food legume research at ICARDA in enhancing food and nutritional security in the developing world
